

**AMENDMENTS TO THE CLAIMS:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**LISTING OF CLAIMS:**

1. (Original) A resin microparticle (A) for a toner raw material satisfying all of the following requirements (i) to (iii):

Requirement (i): A particle diameter of 50% volume (D50) satisfies the relationship  $0.05\ \mu\text{m} \leq D50 \leq 1\ \mu\text{m}$ ;

Requirement (ii): A particle diameter of 10% volume (D10) and a particle diameter of 90% volume (D90) satisfy the relationship  $D90/D10 \leq 7$ ; and

Requirement (iii): The content of an organic solvent is not more than 70 ppm.

2. (Original) The resin microparticle (A) for a toner raw material according to claim 1, comprising a polyester based resin (B).

3. (Original) The resin microparticle (A) for a toner raw material according to claim 2, wherein the polyester based resin (B) is a polyester based resin (B1) having a sulfonic acid group.

4. (Currently Amended) The ~~[[rein]]~~ resin microparticle (A) for a toner raw material according to claim 3, wherein the polyester based resin (B1) is a polyester based resin (B11) having a vinyl based copolymer-derived structure (C).

5. (Currently Amended) The ~~[[rein]]~~ resin microparticle (A) for a toner raw material according to claim 3, wherein the polyester based resin (B1) is a polyester

based resin (B12) which does not contain a bisphenol A-derived structure unit and has the content of tin of not more than 5 ppm.

6. (Currently Amended) The ~~[[rein]]~~ resin microparticle (A) for a toner raw material according to claim 1, comprising a polyether polyol based resin (D).

7. (Currently Amended) An aqueous dispersed system comprising the resin microparticle (A) for a toner raw material as described in ~~any one of claims 1 to~~ claim 6 dispersed in water.

8. (Currently Amended) A toner comprising the resin microparticle (A) for a toner raw material as described in ~~any one of claims 1 to~~ claim 6.

9. (New) An aqueous dispersed system comprising the resin microparticle (A) for a toner raw material as described in claim 1 dispersed in water.

10. (New) An aqueous dispersed system comprising the resin microparticle (A) for a toner raw material as described in claim 2 dispersed in water.

11. (New) An aqueous dispersed system comprising the resin microparticle (A) for a toner raw material as described in claim 3 dispersed in water.

12. (New) An aqueous dispersed system comprising the resin microparticle (A) for a toner raw material as described in claim 4 dispersed in water.

13. (New) An aqueous dispersed system comprising the resin microparticle (A) for a toner raw material as described in claim 5 dispersed in water.

14. (New) A toner comprising the resin microparticle (A) for a toner raw material as described in claim 1.

15. (New) A toner comprising the resin microparticle (A) for a toner raw material as described in claim 2.

16. (New) A toner comprising the resin microparticle (A) for a toner raw material as described in claim 3.

17. (New) A toner comprising the resin microparticle (A) for a toner raw material as described in claim 4.

18. (New) A toner comprising the resin microparticle (A) for a toner raw material as described in claim 5.
